

# 3 ESG Mindset Shifts Indian Companies Need

# From perfection to progress

Waiting for perfect data? You'll  
never start.

Use what you have. Improve over  
time.

# From compliance to culture

Don't just "tick the box."

Let ESG shape decisions, not just disclosures.

# From reporting to relevance

ESG isn't about PDFs.

It's about how your business  
impacts — and survives — in a  
changing world.

# One client's journey

A client started with a basic GHG estimate.

Today, they've onboarded their suppliers and are CBAM-aligned. All because they shifted their mindset early.

# Ready to make the shift?

I don't just consult — I coach  
internal teams to lead from the  
inside.
